New Piston Kits and Cylinder Kits For Cummins® ISL / QSL Engines

August 17, 2016

Federal-Mogul Motorparts announces the availability of new FP Diesel Piston Kits, Cylinder Kits and Engine Kits for select Cummins ISL and QSL engines. These new kits feature articulated piston crowns **FP-4941393** and **FP-4941395** covering the CPLs listed below.

FP Diesel articulated steel pistons feature a proprietary alloy that is forged under high heat and pressure, then cooled and reheated through a special process for a stronger, more consistent microstructure and exceptional durability.

We finish our steel crowns with a proprietary in-house Manganese Phosphate coating process that produces a better grain size and texture. This feature provides greater corrosion resistance against higher sulfate diesel fuels. The coating also improves break-in performance and reduces pin bore scuffing.
