

Gravity

Gravity is dedicated to its employees and customers. We provide the best equipment and services for safe and efficient operations. At Gravity, we own and maintain a large inventory of diesel and natural gas generators, portable site lighting and fluid handling equipment, as well as provide our own convenient trucking services to transport our assets.

We are continually upgrading and expanding our portfolio of equipment and related infrastructure. We work closely with the manufacturers to ensure we have top quality products, and have developed an in-depth preventive maintenance process so our equipment is serviced at optimal intervals for asset integrity and increased run times on motor-driven equipment.

The personal safety and health of our employees are of primary importance. Our employees are extensively trained to operate in the safest and most efficient manner which include monthly mandatory safety meetings and on-line training.

Gravity partners with its customers to help achieve company goals and project objectives. Ultimately, it is the quality of Gravity's service, customer relationships and dedication to employees that contribute to our success.

POWER GENERATION & RENTAL SOLUTIONS

Natural Gas Generators

Natural Gas Generators reduce overall fuel expense by burning propane, produced well head gas or flare gas instead of trucked fuel, for a more environmentally friendly and efficient power option. Gravity offers 45 kVA to 450 kVA single generator power or up to 6,400 kVA parallel generator power.

- remote monitoring to track performance or required maintenance
- can be run in parallel for large power requirements

Diesel Generators

Gravity Diesel Generators provide 3-phase 240/480v output or single phase 120/240v output. Generators are sound-attenuated for quiet operation and have extended run-time fuel tanks.

- broad range of sizes available to meet power needs
- heavy duty diesel engines
- fuel efficient

Flameless Heaters

Safe and efficient flameless technology provides fuel efficient, lean, dry heat. Specifically designed to provide powerful heat in environments where an open flame could be hazardous.

Indirect Fired Heaters

Gravity Indirect Fired Heaters have no combustible gasses in the airflow. Clean, safe and reliable airflow, capable of ducting long distances.

Emergency Shower/Eye Wash

OSHA compliant emergency eyewash and shower for use where eyes or body parts may be exposed to corrosive materials. Provides immediate drenching or flushing of eyes and body.

ANSI Z358.1-2009 compliant

- 20 gallons/minute for 15 minutes with 30 psi water pressure
- Eye wash station - 0.4 gallons/minute for 15 minutes
- Minimum 325 gallons of fresh water capacity
- ANSI-required 8-ft. interior height

Meeting Trailers

Perfect mobile office for consultants to monitor activity during operations and on work-over rigs. These trailers can be used as a cooling station in the summer and protection from cold weather during the winter.

Light Towers

Gravity provides a variety of portable site lighting solutions to meet the application. Diesel powered lighting is available in 8 kW and 20 kW output.

Light tower types:

- Directional Light Towers
- Globe Light Towers
