

# Update Kit GRP-F100784

## Update Kit GRP-F100784

Component Part#	Description	Quantity
N102901	FAN SPACER, 26mm 4LE ISUZU	1
N100928	BRKT LOWER RAD DENSO 4LE	1
N101014	FAN GUARD, CONE	1
N101264	BOLT FLG HD M8-1.25X55 G10.9	4

### Important Installation Instructions

Install and use all new parts in engine accessory kit (GRP-F100784).

Remove original Fan Spacer and install new Fan Spacer (N102901).

Use new Fan Bolts (N101264) with Fan Spacer (N102901).

Fan Spacer required for clearance with new Fan Guard.

Remove original Lower Radiator Support Bracket and install new design Lower Radiator Bracket (N100928).

Loosen, but do not remove or replace the original Lower Radiator Bracket Supports Arms from each side of the engine block. Position arms in the lowest downward position.

Tighten brackets; ensure that they stay in the down position when tightening.

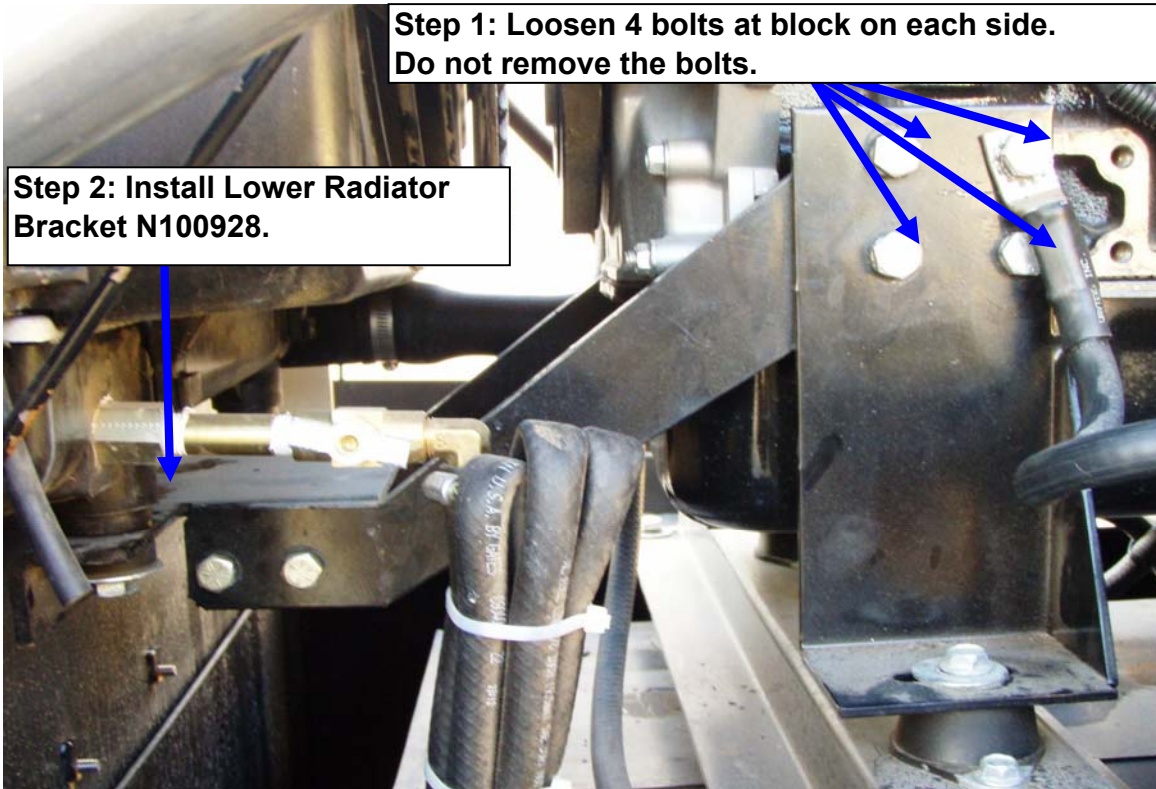

Remove original Fan Guard and install new design Fan Guard (N101014).

Check for 1/2" clearance from Fan tip to Fan Shroud, Fan Guard, or any object that could contact the fan, all the way around the Fan.

### Important: Instructions to Center Fan in Shroud.

**Step 1: Loosen 4 bolts at block on each side.  
Do not remove the bolts.**

**Step 2: Install Lower Radiator  
Bracket N100928.**
