

ELECTRIC MAINTENANCE PANEL

Features

- Land multiple loads for maintenance
- Safe and simple to use
- No interruption in service
- No costly down time

Our commitment to equipment performance and our uptime guarantee.

Gravity knows the importance and costs associated with equipment that needs to be taken out of service for routine maintenance or repair. We utilize Electric Maintenance Panels (EMP) when servicing equipment. EMP's are designed for servicing generators with no interruption in power. Electricians are able to land multiple generators and loads, to services more than one piece of equipment at any given time. The box allows another generator to be paralleled to the current load, allowing the existing generator to be shut down and serviced with no down time.
