- 1 x 1600A main breaker
- Redundant communication network
- All aluminum non-corrosive construction
- Heavy duty cage with lifting eyes and fork lift pockets

Redundant and constant power .

The Gravity Parallel Panel provides a turn-key solution for up to 4 generators, all required generator cabling is included. A single 1600 amp main breaker output provided for up to a 1 MW application. Individual switches and camlock connections for each generator allow for hot swap capability. Network switch with battery backup ensures reliable generator group communications.
