

CHEMICAL SOLUTIONS

Capabilities

- Blend a wide range of production and completion chemicals
- Analyze production issues and customize solutions
- Capability to source, blend, deliver and treat

Tech Management, a Gravity Company, is a trusted partner and provider of Chemical Solutions in up-stream oil and gas markets. We believe in the Tech Management Advantage as a partner for E & P companies across the country through our customer-centric service and world-class products.

We provide a vast array of chemical products and services for water treatment, enhanced productivity, oil and gas recovery, and overall field asset optimization. We take the time to review your current processes and work closely for the most cost effective chemical management program that will yield the greatest results. As a partner in the Tech Management Advantage, we can also offer a full suite of oilfield services in fluid logistics, equipment rentals, and capillary applications.

Through our improving initiatives with a focus on leveraging our capabilities, scale and size, our partners will receive the highest customer service and quality of products.

CHEMICAL SOLUTIONS

Production Chemicals

Products and services provided during the production phase of the well to keep operations continuously flowing.

Asset Integrity Management - products and services that extend the life of production assets.

- Corrosion Control
- Microbial Control
- Hydrogen Sulfide Control

Flow Assurance - products and services that keep production operations flowing to minimize non-productive time.

- Scale Control
- Paraffin and Asphaltene Control
- Iron Sulfide Control
- Hydrate Control

Production Optimization - products and services to ensure optimal production performance.

- Fluid Separation
- Gas Well Deliquification
- Paraffin and Asphaltene Control
- Wellbore Remediation
- Hydrogen Sulfide Scavenging
- Near Wellbore Damage Repair

Completion Chemicals

Products and services applied during the completion of the well, mainly frac operations, are utilized to deliver an optimal frac job and to maximize post-frac production in the early life of the well.

Asset Integrity Management - products and services that extend the life of production assets.

- Corrosion Control
- Microbial Control

Flow Assurance - products and services that assist in a successful frac job and keep early production flowing with minimal upsets.

- Scale Control
- Paraffin and Asphaltene Control
- Frac Fluid Additives
